MONDAY JUNE 26, 1911

Vice stings us even in our pleasures, but virtue consoles us even in our pains.—Athen.

Honolulu looks a hundred per cent better and it ought to feel so.

Hotter than Kansas is now the appropriate way of expressing the extreme.

What a gambler the homesteader has to run before he can do anything more than take a look at the land.

President Taft's shoes are cloying in length and double in width. Big enough to squash the gizzard out of most anything once he puts his foot down hard.

One of the lessons of the Clean-up Day is that the health inspection and garbage force should be increased, and driven about under increased steam and with better efficiency.

If you did but know it, the clean-up day is the first signal that Honolulu appreciates that it must get ready for 1915. The work must be incessant and civic endeavor untiring.

New York city has been presented with a million dollar park overlooking the Hudson. But it isn't half so happy as Honolulu would be with a perpetually clean bill of health.

The latest argument against reciprocity is that a locomotive on a Canadian railway has been wrecked by a mouse. It beats the band what a powerful array of facts is marshaled against the program of the President.

Let it not be said that the Organic Act needs to be changed to admit a Governor from the mainland, because Hawaii has no men in the ranks of its citizens capable of filling the position. There are men enough here if the President wants a change.

One of our exchanges suggests that the reason that one-half the world doesn't know how the other half lives is due to the fact that people have fallen pretty generally into the habit of pulling down the window curtains after the lights are turned on.

When in doubt, clean up—every day.
The latest product of the Home Rule crowd is something very foolish but in it any more so than sending a special representative to New York at an expense to the people of one thousand dollars a month and expenses?

Mayor Fern is to be congratulated on his decision to sign the building ordinance. The content for what this ordinance represents has been fought incessantly by the Bulletin since the Territory was organized, and the fight could not have been successful without city and county government. Session after session of the Legislature, in the days of the old centralized government, the enemies of progress were able to block any legislation of this character even to the extension of the fire limits. County government has won any number of victories for efficient and progressive government, and that is one of the reasons why some people make such a loud noise in criticizing it.

Dr. Mary E. Pennington, chief of the Food Research Bureau of the Federal Agricultural Department testified the other day that she would rather eat a cold storage egg of the January vintage than a fresh barnyard egg laid in the summer time. It beats all how some people gain fame. Take the January egg Mary.

A son of the late E. H. Harriman was defeated the other day in a contest for the exalted position of assistant manager of the Yale crew. The successful candidate is reported to have no money but plenty of brains. So the country breathes a sigh of relief and feels there is still hope for Yale.

Secretary Stimson is criticised because he doesn't know anything about war. If he knows enough to let the men who do know about war, proceed with their plans for the defense of the country, he will satisfy all the demands of his office and make a record just that much better than some of his predecessors who thought they knew it all.

The editor of the Fresno Republican describes his relief on leaving behind the sticky heat of Chicago recently for the dry heat of the Mojave desert. He declares that the dry heat of the desert was bracing and pleasant. The Eastern heat he describes as damp, depressing and intolerable.—Pasadena News.

If he will travel to Honolulu, he will find a refined heat with all the hot taken out of it in the warmest mid-summer day.

Republican leaders are enjoying a regular epidemic of unpopular proposals. The latest is from Congressman Mann that the word "applause" and similar expressions of loud cheers from the floor and galleries, be eliminated from the speeches "delivered" in Congress and published in the Congressional Record under "leave to print." This is the one opportunity a Congressman has of putting himself before his constituents just as he would like to be.

GARBAGE AND SEWER CHARGES.

Most certainly the prompt disposal of garbage by the householder should be compulsory.

And most certainly should the garbage be collected by the authorities free of charge.

Of all the outrages this city and the Territory perpetrate against a more perfect sanitation, by all means the worst is the charge for garbage collection and the charge for use of the sewer after having paid the connection fee.

This policy of pay, pay, pay, throws the burden where it falls worst and loses the least good.

If there is any work or any public service that is rightfully a charge against the general revenues of the city and Territory, it is that which guarantees keeping the city clean, of rubbish and sewage. But under the "money making" idea of government that developed somewhere in the dark ages and has sprung up in this part of the world with a partial endorsement by "wealth and intelligence," the poor man is forced to pay for that which should be included in the general expenses of the city and Territory.

It is the same sort of a game as that of the advance in the water rates against which the people protested so vigorously.

Compulsory garbage cleaning by the householder should be strictly enforced accompanied by free garbage collection by the city.

Compulsory sewer connection should be enforced in every section of the town where the sewer runs, and there should be no other charge against the householder than the original cost of connection with the sewer system.

It is no harder to make a dirty

child wash his face regularly and pay for the soap and water he uses, than to keep a city clean by levying a direct charge against every household or tenant owner who complies with the rules and regulations of civic cleanliness.

REORGANIZATION OF GARBAGE DEPT.

(Continued from Page 1)

and we have to appropriate \$1400 monthly to keep up with the work," he said. "Moreover, six of our sanitary inspectors, whose salaries amount to \$85 monthly each, have been practically turned over to the Board of Health, so that they are a loss to us of \$510 monthly.

"Beginning with July, we will appropriate \$1600 monthly for garbage collection and destruction, but this will not keep us up with all the work.

"The trouble is that we can not force people to have their garbage removed. Only the Board of Health can do that. If it was compulsory on the householders to have their garbage removed and pay a certain monthly rate that would meet expenses, the problem might be solved."

Chairman George R. Carter of the sanitary commission said this morning:

"As an interesting commentary on the garbage system, it might be said that in 1909 the supervisors had to appropriate \$2000 for garbage collection. In 1910 the system was changed so that it might be on a self-supporting basis, and the results were that the county came out \$195 to the good. Now in 1911, the public subscribes \$2600 for doing the work that was supposed to be done under the system that showed the profit last year."

Great Work Done.

However, all this does not detract from the splendid work done by the citizens on Clean-Up Day. Every committee came through with splendid results. In this connection, mention should be made of the good work of the transportation committee, Dr. W. G. Rogers, chairman. This committee, through the courtesy of C. Montague Cooke, supplied a special automobile for the representatives of the press, Mr. Cooke himself driving it, and when unfortunately it went a little bit to the bad, Dr. Pratt of the Board of Health and Chief Sanitary Inspector Charlock placed their machine at the disposal of the reporters.

Ed Towse, who had charge of the downtown district, reported this morning that all would be clear by noon. More than 500 cartloads were hauled from this district Saturday, and nearly one hundred before 10 o'clock this morning.

Dr. Pratt of the Board of Health was in practical charge of the collection of the garbage today. The county authorities turned over to him twenty-four carts and seventeen men. He tackled District 5, the downtown section, this morning, and expected to start on 4A and 4B, which extend from Punahoa to the sea, when the downtown work was ended. It was figured yesterday that there would be 620 loads to be carted away today.

J. P. Cooke of the finance committee came into the Clean-Up Day headquarters this morning more than enthusiastic over the work accomplished. "It was splendid," he said. "The only thing to do now is to keep it up."

Chairman Berndt estimates that it will be two or three days longer before all of the districts have been cleaned. Inspired by the first day's results, many householders spent part of yesterday in piling up rubbish along the streets to be taken away.

CITY WAGONS REQUISITIONED

The City and County garbage department force of employees together with all the available transportation at the call of this branch of the municipality.

FOR PHYSICIANS AND HOSPITALS

How can physicians and hospitals afford to hold chronic kidney patients to certain failure on the orthodox treatment when by a simple addition recovery is possible in many cases? We record below another recovery in a case of Bright's disease declared incurable by the books.

Mr. John Anderson, 660 Bryan Avenue, Fort Worth, Texas, wrote on December 6, 1910, from which we extract:

"I would like to have your opinion and will give you my symptoms. My legs, thighs and stomach are badly swollen. My doctor tried strong purgatives to relieve the dropsy, but to no purpose. Four months ago the swelling was so bad that my lungs were full and the elimination was almost solid with albumen. I was in bed three months previous to taking the Renal Compound. It has done me more good than anything else, but I am still bed-fast."

Prescriptions were sent to aid the Compound to reduce the dropsy.

On January 27, 1911, Anderson again wrote as follows:

"I wish to thank you for the letter and prescriptions. I have completely recovered. I had a test made two days ago and am perfectly free from albumen. Barring weakness I feel as well as I ever did. I have been out of bed just three weeks, having been confined to bed nine months. It has taken about twenty-five bottles to cure me. Of course, I was in a terrible condition, and the results have surprised all who know how bad I was. I do not suppose you need a testimonial, but you are perfectly welcome to use my name if you wish."

Honolulu Drug Co. is local agent for Fulton's Renal Compound.

For literature write John J. Fulton Co., 615 Battery St., San Francisco.

elapal government was pressed into service today to assist in hauling away the accumulation of rubbish that was collected on last Saturday as a result of the general and widespread campaign of the Clean-up committee.

The city road department also contributed a number of men as well as teams towards carrying on the work of completing the stupendous job of cleaning up the town.

BRITISH CRUISERS CLOSE TO PORT

Once more Honolulu is being honored by a visit from the British cruiser Kent which will enter the harbor sometime late this afternoon and dock either late tonight or early tomorrow morning.

The British cruiser Challenger which was expected to arrive along with the Kent will not reach port until sometime Wednesday.

Both ships have been sailing slowly through South American waters touching at the most important ports only. From here they will sail for the waters of China on July 5th.

Both will dock at pier No. 2, where the last Japanese ships stayed, taking on provisions and coal. Their provisions will be supplied by Honolulu dealers but it is hardly expected that they will receive their coal from here—as they have their own collier following close behind and will be due to arrive soon after the Challenger.

Captain Leo Sahn will do the honors and pay respects just as soon as the Kent nears the harbor allowing him the opportunity of boarding her.

Tomorrow morning Rear-Admiral Cowles will board the Kent and interchange salutations with the British Commodore. All the ceremonies will be carried out very simple but most effectively.

The officers in charge of both ships are not at present known as wireless communication was cut off, all such detail however will be known tomorrow morning.

Of the two ships in the Monmouth class the Kent was the first completed in 1903 and has a water line length of 440 feet, beam 66 ft., mean draught 24½ wit ha length overall of 448 feet.

Her complement is 678 and displacement 9800 tons.

Fourteen 6-inch guns, nine 12-pounders, three 3-pounders and two submerged torpedo tubes comprise her armament.

The Challenger's displacement is 5915 tons and a complement of 475 being somewhat smaller than the Kent. Her beam is 66 ft. length, 355 feet and maximum draught 21½ feet. Eleven 6-inch guns, nine 12-pounders, six 3-pounders, two Maxims and two submerged torpedo tubes make up her armament.

SHE GOT WHAT SHE WANTED

This Woman Had to Insist Strongly, but it Paid

Chicago, Ill.—"I suffered from a female weakness and stomach trouble, and I went to the store to get a bottle of Lydia E. Pinkham's Vegetable Compound, but the clerk did not want to let me have it—he said it was no good and wanted me to try something else, but knowing all about it I insisted, and finally got it, and I am so glad I did, for it has cured me."

"I know of so many cases where women have been cured by Lydia E. Pinkham's Vegetable Compound that I can say to every suffering woman if that medicine does not help her, there is nothing that will."—Mrs. JANETSKI, 2903 Arch St., Chicago, Ill.

This is the age of substitution, and women who want a cure should insist upon Lydia E. Pinkham's Vegetable Compound just as this woman did, and not accept something else on which the druggist can make a little more profit.

Women who are passing through this critical period or who are suffering from any of those distressing ills peculiar to their sex should not lose sight of the fact that for thirty years Lydia E. Pinkham's Vegetable Compound, which is made from roots and herbs, has been the standard remedy for female ills. In almost every community you will find women who have been restored to health by Lydia E. Pinkham's Vegetable Compound.

EVENING SMILES

"You're a fine sort of a husband. Why, before we were married you said you would be willing to die for me."

"Well, I had me life insured, didn't I?"

"Yes, but yer alive, ain't you?"

"I'll never take you out to a banquet again. Ye disgusted me last night."

"Why, what did I do?"

"The minute ye sat down at the

table ye began choonin' the menu card, and by the time I got it ye'd choosed down to the second course and I got no soup."

"When ye began askin' for nut picks. Nut picks! Don't ye know better than ask for picks at an Irish banquet? It ain't even safe to serve the ice cream in bricks."

"Then when the woman next to you said her cocoa was cold, yer told her to put her hat on. And how did I know who ye meant when ye said 'Pass the lobster'?"
